Developmental Psychology: From infancy to adulthood, 3rd edition, continues to bring together a balanced focus on Australian and international research contributions in developmental psychology. Students and lecturers alike will find this text addresses the issues of lifespan development in a rigorous and challenging way using a thematic rather than chronological approach. International and national research on graduate attributes consistently identifies critical thinking as one of the most important skills for psychology students. The inclusion of Critical Thinking for Group Discussion at the end of each chapter is designed to encourage students in the development of this key skill. These questions and critical thinking applications help students develop the ability to engage in discussions on truth and validity and evaluate the relative importance of ideas and data. Students learn by doing, and this is encouraged through interactive features such as Stop and Review, Research Focus Boxes, and Practical Exercises which engage them in group discussion and challenge them to delve into complex and cross-domain analysis of lifespan development. Concept maps at the start of each chapter provide students with a visual snapshot of the chapter content.

Life Span Motor Development, Seventh Edition With HK Propel Access, is a leading text for helping students examine and understand how interactions of the developing and maturing individual, the environment, and the task being performed bring about changes in a person's movements. This model of constraints approach, combined with an unprecedented collection of video clips marking motor development milestones, facilitates an unmatched learning experience for the study of motor development across the life span. The seventh edition expands the tradition of making the student's experience with motor development an interactive one. Related online learning tools delivered through HK Propel include more than 190 video clips marking motor development milestones to sharpen observation techniques, with interactive questions and 47 lab activities to facilitate critical thinking and hands-on application. The lab activities may be assigned and tracked by instructors through HK Propel, along with chapter quizzes (assessments) that are automatically graded to test comprehension of critical concepts. The text also contains several updates to keep pace with the changing field: Content related to physical growth and development of the skeletal, muscle, and adipose systems is reorganized chronologically for a more logical progression. New material on developmental motor learning demonstrates the overlap between the disciplines of motor development and motor learning. New insights into motor competence help explain the...
relationship between skill development and physical fitness. The text helps students understand how maturational age and chronological age are distinct and how functional constraints affect motor skill development and learning. It shows how the four components of physical fitness—cardiorespiratory endurance, strength, flexibility, and body composition—interact to affect a person’s movements over the life span, and describes how relevant social, cultural, psychosocial, and cognitive influences can affect a person’s motor development. This edition comes with 148 illustrations, 60 photos, and 25 tables—all in full color—to help explain concepts and to make the text more engaging for students. It also retains helpful learning aids including chapter objectives, a running glossary, key points, sidebars, and application questions throughout each chapter. Life Span Motor Development, Seventh Edition, embraces an interactive and practical approach to illustrate the most recent research in motor development. Students will come away with a firm understanding of the concepts and how they apply to real-world situations. The complementary feeding period from 6 to 24 months is a crucial part of the first 1000 days of development. It marks the transition from exclusively milk-based liquid diet to the family diet and self-feeding. During this period, healthy food preferences and feeding practices are formed. The papers in this book were presented at the 87th Nestlé Nutrition Institute Workshop in Singapore, May 2016. Divided into three parts, they provide updates and recommendations, as well as insights into strategies and interventions, from all around the world. The first part addresses the role of complementary feeding in healthy development, focusing on food types and the timing of solid food introduction. The second part examines determinants of growth restriction and discusses effective interventions in infants and children in low- and middle-income countries. The last part focuses on development and ‘programming’ of behavioral and psychological aspects to prevent childhood obesity in high socioeconomic settings.

Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFESPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students’ interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail’s expertise in childhood and adolescence, combined with John C. Cavanaugh’s extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. Connect with Lifespan Development and connect with success. Informed and driven by research. At McGraw-Hill, we have spent thousands of hours with you and your students, working to understand the key needs and concerns you face in Human Development courses. The most common topics raised include managing the vast amount of content inherent to a lifespan course and ensuring the dependability of the assigned material—is it current and accurate? The result of this research is John Santrock’s Life-Span Development. Life-Span Development ensures students complete and understand the assigned material in a number of ways: Santrock’s hallmark Learning Goals pedagogy provides a comprehensive roadmap to the text material, clearly pointing out the core concepts fundamental to students’ learning and performance. Our adaptive study tool, LearnSmart, increases students’ efficiency in studying by identifying what they know, and more importantly what they don’t know, providing immediate remediation for the areas in which they are struggling. At the same time, instructors have access to powerful, visual reports allowing them to quickly see where students’ strengths and weaknesses lie. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. The 14th edition continues with the connections theme to help students better understand the concepts among the different aspects of life-span development. This recurring theme of connections—Developmental Connections, Topical Connections, Connecting Development to Life, Connecting with Careers, and Connections through Research—ties together concepts from across chapters to reinforce the learning process and connects the material to students’ everyday lives and future aspirations. Our Milestones of Development video series helps bring the course material to life, allowing students to witness development as it unfolds. And of course, all of the text material is informed by Life-Span Development’s unique board of expert consultants—a who’s who of developmental psychology—who make sure the material is as accurate and up-to-date as possible.
